

Catwalk Systems

Tubular Handling Catwalk reduces relocation time and cost.

LANDRIG  OFFSHORE

PIPE HANDLING
LTD

Pipe Handling, a UK based company, is a specialist in offering tubular handling equipment for the drilling, workover and shale gas drilling industry globally.

Pipe Handling's vision is to be one of the leading onshore equipment companies for tubular handling equipment supply, repair, replacement parts and field service.

Pipe Handling guarantees high quality for each and every package. If required, we can also provide warranties for complete installations – uniquely offering the client, one responsible supplier for the entire package.

Cost Effective, High Quality Solution

OUR APPROACH

Pipe Handling's vision is to be one of the leading offshore equipment companies for tubular equipment supply, repair, replacement parts and field service. We offer our global customer's lifecycle support that includes equipment commissioning, training, technical support, re-certification and repair service.

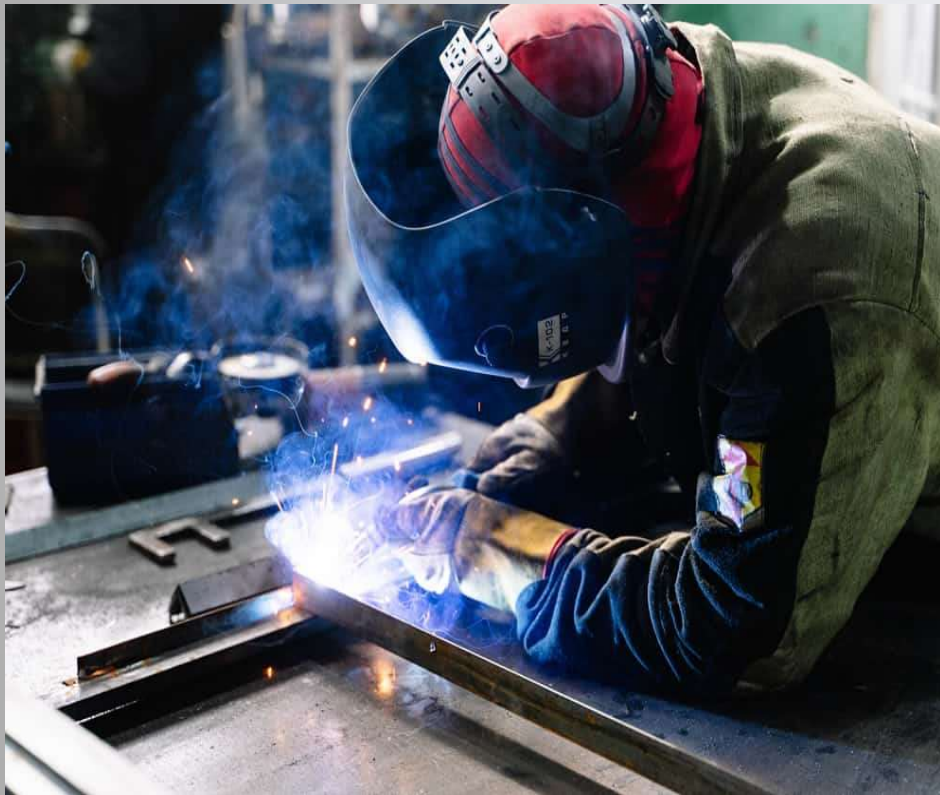

With a total commitment towards service and on-time delivery, all contracts from major installations through to maintenance projects are tailor-made packages designed and project managed to suit the individual client's requirements.

Designed and tested to highest
Safety of factor to DNV and API Standard
